
Oracle Agile 9.3.3 Product Portfolio Management**Duration: 1 Days****What you will learn**

This Agile 9.3.3 Product Portfolio Management (PPM) training deep dives into using the Agile PLM solution for project management. Expert Oracle University instructors will help you deepen your knowledge of change control and lifecycle management.

Learn To:

Create projects with phases, tasks and gates that are dependent upon PLM objects, such as part lifecycle phases.

Use the Gantt chart interface to rapidly and visually adjust schedules and resources.

Understand the different user interfaces.

Create project templates.

Add resources to a project.

Create dependencies within projects and with PLM objects.

Audience

End Users, Functional Implementer, Project Manager
