
R12.x Oracle Project Foundation Fundamentals

Duration: 3 Days

What you will learn

This course will be applicable for customers who have implemented Oracle E-Business Suite Release 12 or Oracle E-Business Suite 12.1.

In this course, students will learn about implementing the common features shared across the products in the Release 12.x Oracle Enterprise Project Management solution. This course covers implementing shared setup, from defining implementation options to creating project types and project templates. This course also discusses shared features, including utilization reporting, financial structures, and user-defined attributes.

Students will also learn how this product integrates with the Oracle eBusiness Suite. Students will learn through the use of tutorials, supplemented with guided demonstrations and hands on practices.

The products in the Oracle Enterprise Project Management solution share a foundational set of common features and setup steps. Other courses in the Oracle Enterprise Project Management solution learning path cover features and setup steps specific to the individual applications.

Learn To:

Identify key features of each product in the Oracle Enterprise Project Management Solution

Integrate the Oracle Project Suite with other applications in the Oracle eBusiness Suite

Understand the impacts of key implementation decisions
