## **R12 Project Resource Management Fundamentals**

**Duration: 1 Day**

### **What you will learn**

In this course, students will learn about the implementation of R12 Oracle Project Resource Management. The course encompasses key setup considerations, from implementing project staffing, to creating a project forecast based on existing staffing plans, and explains some of the impacts of implementation decisions. Students will learn through the use of tutorials, supplemented with guided demonstrations and hands on practices.

Oracle Project Resource Management is an integrated project staffing application to help you manage project resource needs, profitability, and organization utilization by locating and deploying qualified resources to your projects across your enterprise. Oracle Project Resource Management empowers key project stakeholders, such as project managers, resource managers, and staffing managers with information to make better use of their single most critical asset: their people. Oracle Project Resource Management is part of the Oracle Enterprise Project Management solution. Oracle Enterprise Project Management provides a set of applications that help companies deliver global projects by integrating and managing project information. It enables all persons at all levels of the enterprise to participate and collaborate on the projects at appropriate levels in a centralized environment.
